

## Mat Style Conveyors from Nercon

Plastic Belt Mat Style Conveyors are ideal for packaging or food handling applications because the belt construction allows for easy cleaning and low maintenance. Mat Style Plastic Belts provide long life, high impact resistance and are approved for FDA and USDA direct food contact.

The sprocket driven Thermoplastic belts ensure positive tracking while providing quiet, smooth and trouble-free performance. Plastic Mat Style Conveyors provide a very stable product flow which results in less tipping and decreased product damage.

Mat Style Plastic Belt Conveyors provide design flexibility for ease of layout. Side turning belts allow products to be transported in minimum floor space.

Nercon's Mat Style Plastic Belt Conveyors are found not only in the food packaging and handling industries; they are also found in beverage, personal care, household and paper product industries.

Mass flow transportation of empty and full containers is accomplished smoothly on flat top Mat Style Belt Conveyors.

Minimum transition points are possible with small pitch Mat Style Belts.

A broad selection of Mat Style belts and Mat Style Conveyor designs are available to meet a wide variety of conveying applications.
