

Heavy Duty Equipment

Nercon engineered this conveyor to weigh and scan bar codes on 3,000 lb. master paper rolls.

Commercial Paper Roll Conveyors:

Nercon designed a conveyor that transports 3000 lb. commercial paper rolls. The rolls are transported into an automated retrieval system for storage. The system included a 360 degree turntable to size, weigh and read the bar code on each roll.

Appliance Production Lines:

Nercon has designed and manufactured conveyor lines for large appliances. Applications include twists, turns, accumulation zones, ergonomic lifts, elevators and assembly stations.

Nercon has engineered and manufactured appliance handling lines for the top appliance manufacturers in the United States.

An ergonomic lift device used in appliance production.

Nercon engineered and manufactured this cooling conveyor system to transport molded decking boards.
