

Household & Chemical Conveyors & Equipment

Light Trays are stacked and accumulated on this equipment.

New consumer products drive household and chemical industry toward resourceful packaging. Some of these packages are odd shaped or very light and require expertise in conveying. Nercon has the expertise in handling all types of packaging in the household and chemical industry from household sprays and detergents to all types of saturated wipe products.

Nercon has engineered various types of equipment to handle a magnitude of package types within the Household/Chemical industry. Using chemical resistant properties for chain and conveyor components, Nercon has designed numerous systems for bleach, detergent and other corrosive wet or dry chemicals. Nercon has also engineered a number of systems handling the saturated wipe products such as for dusting or cleaning. Both stacks of wipes as well as the light containers have been conveyed in Nercon systems.

This first-in, last-out vertical accumulator is specially designed to handle tubed packages.

Bleach handling conveyors integrated with a Vision system to check product fills and cap closures

Pressureless combiners, Re-Flow and bi-directional accumulation tables, vertical and serpentine accumulators, alpine conveyor systems, gripper elevators, product reorienters, and merging and diverting conveyor systems are equipment products that Nercon has manufactured in the industry.

Nercon has engineered air conveyor systems and stacking systems to handle tray products. Twist equipment has also been engineered to convey and twist stacks of the wipe products.

Household air fresheners are system accumulated on this alpine conveyor
