

Pharmaceutical Conveyors & Equipment

This powered belt curve conveyor is transporting wrapped bandages.

This rotary table single files small vials into the production line.

Nercon offers Pharmaceutical manufacturers sanitary design stainless steel conveyor systems to prevent cross contamination between different products. Designed for accessibility for cleaning, reliability and flexibility, Nercon has manufactured systems to convey small vials, small bottles, blister packs, bags, tubes and small cartons.

Applications include: accumulating, denesting, combining, unscrambling, rejecting, inclining, transferring, code dating and gap transporting.

Nercon has manufactured equipment such as transportation conveyors, bag dryers, serpentine tables, accumulation tables, rotary tables, vertical accumulators and side gripper belts for the Pharmaceutical Industry.

Nercon has engineered and manufactured numerous cleated inclines like this door-access model that was designed to elevate toothbrushes.

This serpentine accumulator provides cooling time for small vials of liquid medical products.
